

### **ANTH 3321: Indigenous Peoples of North America**

#### ***3 Credit Hours***

This course presents the study of contemporary issues affecting Native American peoples through a survey of traditional cultures and culture change.

### **ANTH 3325: Forensic Medicine**

#### ***3 Credit Hours***

This course exposes students to the scientific fields involved in death investigation. This course covers theory and techniques related to identifying human remains and determining the cause of death in a medicolegal setting. The format of the course allows students to explore multiple disciplines, including forensic pathology, toxicology, anthropology, radiology, and careers in death investigation. Case studies and optional field trips allow students to explore the practical applications of course materials.

### **ANTH 3330: Forensic Anthropology Field Techniques**

#### ***3 Credit Hours***

This course exposes students to the role of forensic anthropology in the investigation and recovery of clandestine burials. This course covers theory and techniques related to the identification, mapping, and recovery of forensically significant remains. The intensive field methods allow students to work in a team-based environment to practice methods in forensic archaeology. A large portion of this course is held outdoors at the Forensic Anthropology Field Lab (FAFL) at the KSU Field Station.

### **ANTH 3335: Archaeology Field Techniques**

#### ***3-6 Credit Hours***

*Prerequisite: ANTH 3305*

This course is an archaeological field course designed to teach students the skills and techniques of modern archaeological survey, excavation, and laboratory analysis. The site of the local field school varies from year to year, but the international opportunity is an archaeological site in Belize, Central America. Contact the professor prior to registration for the determination of credit hours.
